

Is there a resemblance between the Operating Expenses of the Telecommunication sector and Mineral Sector in Year 2 when compared?

Telecommunication sector - Other Operating Items in year 2

Mineral Sector - Operating Item in year 2

This is a representation of the operating cost of mineral sector and telecommunications sector for the second year for all the companies represented.

With the mean of the mineral sector being 712Million and Median being 450Million. and that of the Telecommunications sector being 8 billion to a median of 4 billion. both distributions are rightly skewed.

Recording a standard Deviation of 7billion for telecommunications sector and 559million for mineral sector, the variability of operating expenses of the telecommunication sector is higher with more companies spending above 2billion In expenses.

Judging by the range, the operating expense incurred by firms in the telecommunication sector is relatively unstable and high when compared with those of the firms in the mineral sector.
